PROFESSIONAL SUMMARY

Full stack developer with 5+ years of experience. Currently at Jimber, working on a multi-tenant security platform in TypeScript (NestJS, Vue, Prisma, MySQL), with some Go on the endpoint agent. Before that, React and Node applications for agency and freelance clients. Joined Jimber from a React and Node background and was shipping in their stack within two weeks.

WORK EXPERIENCE

Jimber Nov 2023 - Present

Full Stack Developer | Remote

A Belgian security start-up whose SASE platform gives 1,000+ users secure access to their company's network and apps.

- Handled about 40% of the web tickets in the latest release, and wrote or reworked a large share of the platform's current code.
- Designed and built a reusable advanced filtering system across the stack: Vue filter components with URL state, and a mapper that turns filters into Prisma queries. Used across about 10 admin tables.
- Designed and built a change history system for the admin platform: event-driven capture across 12 modules, per-module mappers that turn records into readable JSON snapshots, and a two-column before/after view.
- Made API permissions modular with an @AccessControl decorator and per-module permission maps for company roles, platform roles and company types. Also worked on user and group sync from Microsoft Entra ID and Active Directory.
- Built the management side of the platform's network and security settings: NestJS APIs, data models and Vue dashboard pages for on-premise networks, web filtering, SSL inspection and Zero Trust Outbound. For EDR and DNS filtering, also wrote parts of the Go endpoint agent.
- Built shared frontend foundations: FormKit plugins (automatic test IDs for Playwright, input trimming, tag lists), a shared UI package, and the move to a generated TypeScript API client. Also built the original feature-flag system and finished the move off Flagsmith.

Digital Roots GTC May 2021 - Oct 2023

Full Stack Developer | Remote

A software agency in Kuwait, building web applications for Gulf businesses.

- Built the complete backend, on my own from start to finish, for an Uber-style on-demand app connecting customers in the Gulf with handymen.
- Earlier, as part of larger teams, worked on the restaurant management dashboard for a Gulf-wide booking platform and on a Gulf job board.
- React and Redux with Node, Express and MongoDB or MySQL, real-time features with Socket.io, deployed on GCP and Azure.

Freelance Apr 2020 - Feb 2023

Full Stack Developer | Remote

- Built a university's official grades app for its students, which reached 50,000+ downloads on Google Play (React Native, integrated with the university's API): grade notifications, full grade history, university news and tuition fees.
- Built a post-surgery patient follow-up system for a medical client end to end: a Node, Express and MongoDB backend, a React admin dashboard for surveys and patient registration, and separate doctor and patient React Native apps with reminders and messaging.
- Built a flight booking platform for a client in Bangladesh end to end: a Node backend integrated with the SSLCommerz payment gateway and the client's fare scraper, plus React customer and admin frontends.
- Built two university management dashboards (employee records and board decisions) with Node, MongoDB, AWS S3, React and Material UI.

EDUCATION

Bachelor's Degree in Computers and Information Technology, EELU 2015 - 2019
Egypt

SKILLS

Languages: TypeScript, JavaScript, Python, Go **Frontend:** Vue.js, React.js, Redux, Tailwind CSS, FormKit, Material UI, HTML, CSS
Backend: NestJS, Node.js, Express.js, REST APIs, Socket.io **Databases:** MySQL, PostgreSQL, MongoDB, Mongoose ODM, Prisma ORM
DevOps, Cloud & Testing: Docker, Docker Compose, GitHub Actions, CI/CD, GCP, Azure, Linux, Git, Playwright
AI-Assisted Development: Claude Code, GitHub Copilot **Languages (spoken):** Arabic (native), English (full professional), German (elementary)

INTERESTS

Video games (especially JRPGs, Nintendo titles and Final Fantasy XIV), anime, and learning about languages and cultures, especially while traveling.
