PROFESSIONAL SUMMARY

Full stack developer with 5+ years of experience. Currently at Jimber, working on a multi-tenant security platform in TypeScript (NestJS, Vue, Prisma, MySQL), with some Go on the endpoint agent. Before that, React and Node applications for agency and freelance clients. Joined Jimber from a React and Node background and was shipping in their stack within two weeks.

WORK EXPERIENCE

Jimber Nov 2023 - Present

Full Stack Developer

Remote

- Handled about 40% of the web tickets in the latest release of Jimber's SASE platform (ZTNA, SWG, SD-WAN).
- Backend in NestJS, Prisma and MySQL on a multi-tenant SaaS platform.
- Frontend in Vue, TypeScript, Tailwind and FormKit.
- Go development on the endpoint agent.
- Playwright end-to-end tests for the main user flows; services containerised with Docker.

Digital Roots GTC May 2021 - Oct 2023

Full Stack Developer

Remote

- Built client web applications end to end at an agency, from the React frontend to the Node backend.
- React and Redux on the frontend; Node, Express and MongoDB or MySQL on the backend, including real-time features with Socket.io.
- Deployed and maintained the apps on GCP and Azure.

Freelance Apr 2020 - May 2021

Full Stack Developer

Remote

- Web applications for clients in React, Node and Python, from scoping the requirements through to delivery.
- React frontends with Material UI or Tailwind; Node/Express and MongoDB backends.
- Several clients at a time, as their only point of contact.

EDUCATION

Bachelor's Degree in Computers and Information Technology, EELU 2015 - 2019

Egypt
